THE ULTIMATE STRENGTH TEST

Having a great looking vanity is one thing. Having a vanity strong enough for your whole family is another!

We tested the strength of a 1500mm wall hung vanity installed using the bare minimum number of fixings to meet our installation instructions. Then we loaded it with 37 bags of cement totalling 740kg. With our solid rear panel which is tongue and grooved into the cabinet the vanity supported this full weight. With Timberline, you can be assured you aren't just getting a pretty face! Our vanities are tough!

740kg!! On a wall hung vanity!

Installation, Care & Warranties

INSTALLATION INSTRUCTIONS (CABINETS)

All installation works should be carried out by a licensed tradesman according to the 'Plumbing and Drainage Code of Practice' and the requirements of any relevant statutory body.

- All wall hung, floor standing and on legs vanities/tallboys must be mounted to the wall.
- Please check thoroughly prior to install. See install instructions.
- During the framing and rough in stages of construction ensure that there are sufficient fixings for the mounting of the vanity cabinet. There should be at least two vertical studs for fixing provided not more than 100mm from each edge of the cabinet.
- Ensure that the wall is straight and plumb and free from any bow or twist otherwise the drawers and doors will be out of alignment.
- The solid back of the cabinet must not be damaged, removed, cut or drilled more than is necessary for the access of the plumbing pipes.
- During installation the cabinet should be fixed with screws through the solid back of the cabinet. The screws should be suited to the stud material and have a pan or counter sunk head. Provide a horizontal row of screws within 100mm vertically from the top of the cabinet at a maximum of 300mm horizontal spacing. The screws closest to the left and right edge of the cabinet should be within 100mm of each side.
- Prior to fixing the top to the cabinet with silicone ensure that the cabinet is level and plumb in all directions. If not remove the cabinet and pack or straighten the wall accordingly.
- After installation use the adjusting screws of the hinges and drawer runners to align the doors and drawers.

Detailed instructions are included with the vanity. Cabinets should be installed at least 300mm away from showers or bathtubs to avoid water damage. Care must be taken to immediately dry any condensation spillage or water leakage that may gain access to the cabinet.

What Makes Our Furniture Special?

Tongue And Groove Jointing

All the solid backs and bases are assembled with a tongue and groove joint with multiple cam fix points. This creates exceptional strength and durability, particularly for wall mounted cabinets. The tongue and groove joint prevents the side from pulling away from the back when pressure is placed on the vanity top.

Soft-Close Hinges

Only the best European fully adjustable hinges are used. This allows them to be easily adjusted and offer a long life span. All hinges include built in soft-close mechanisms.

Moisture Resistant Board

All our cabinets are manufactured with Moisture Resistant (MR) Board. This gives you the best protection against swelling and other moisture damage. All our board is sourced from responsible, certified suppliers, and is an "E0" low formaldehyde eco-friendly product.

Solid Vanity Back

At Timberline we always use a full 16mm solid back. This ensures the greatest stability for our vanities and makes mounting and installing a breeze. We never use a 3mm paper lined MDF back.

Construction Brackets

Specially designed internal brackets make a neat and strong finish.

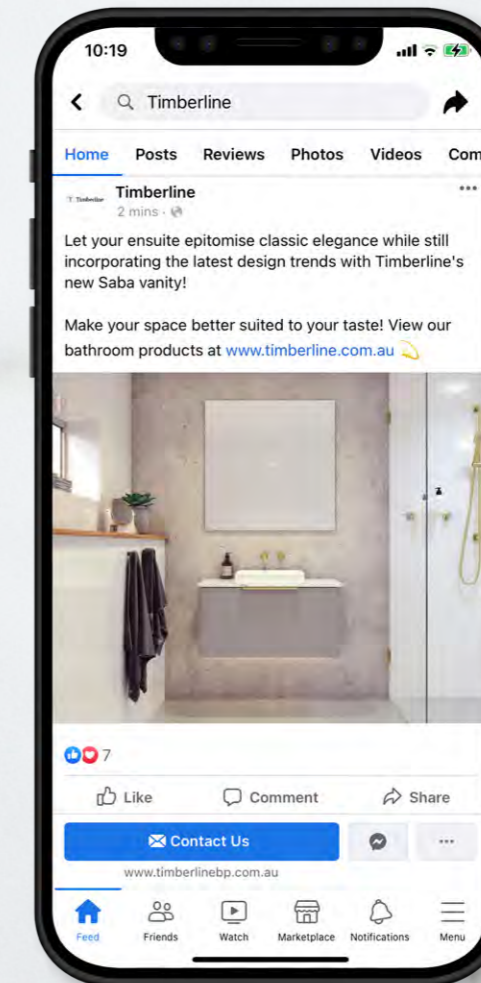

Durable Edging

The edging on our woodgrain cabinets is a strong ABS with matching grain. This means you will get years of durable service from your new woodgrain cabinet.
